

Laser Escape

Please check your resource packs for any supplied items, you may also find other items around your home which will work too!

Resource List			
Quantity-Per Group	Item	Quantity	Item
2	Rolls of masking tape		
1	Yarn Wool or String		

Activity image gallery (plans, maps, diagrams, photos, links, instructions, recipes, production stages etc.)

Task:
In groups of 6-10 build a maze in between a hallway pretending to be a spy getting through a laser field. Once created do not touch the string otherwise you're out.

- The Maze must be created with all the resources provided.
- When building the maze participants should keep testing the maze throughout the activity.
- Once the time is up participants may not add or keep fixing the maze.
- The Maze will be judged at the end of the activity.

Extension / Variation:

- Set a timed relay to see how fast teams can get through their mazes
- Add stickers at various points in the maze (difficult to reach spots) and challenge participants with successfully tapping the sticker a certain amount of times before moving on – up the difficulty!
